

Request for Proposal (RFP)

Project Overview

Project Title: 'RFP for 5052-H32 Aluminum Sheet 4x8 Supply from Alro Steel to Nexa2'

Client: Nexa2

Industry: aluminum sheets

Date: October 26, 2025

1. Introduction

Introduction

Nexa2 is a mid-sized enterprise operating in the aluminum sheets services industry. Our business is heavily reliant on the consistent supply of high-quality 5052-H32 Aluminum Sheet 4x8. This material is critical to our operations and we require a reliable and qualified supplier who can meet our needs in terms of quality, timely delivery, and competitive pricing.

The business problem we are currently facing is the need for a dependable supplier for our 5052-H32 Aluminum Sheet 4x8. Our operations are significantly impacted by the quality and availability of this product, and we are seeking a supplier who can provide us with the assurance of consistent supply and quality.

Our strategic goal is to establish a long-term partnership with Alro Steel to supply 5052-H32 Aluminum Sheet 4x8 to our Buffalo, New York location. We have identified Alro Steel as a potential supplier due to their expertise in aluminum sheets, and their reputation for excellent customer service and competitive pricing. Our target budget for this supply is between \$10 and \$450.

The desired outcome of this Request for Proposal (RFP) is to secure a reliable supplier who can meet our needs for 5052-H32 Aluminum Sheet 4x8. We are looking for a supplier who can provide us with assurance of consistent quality, timely delivery, and competitive pricing, and who can contribute to our operations in a meaningful and positive way.

We look forward to receiving proposals that demonstrate a clear understanding of our needs and offer a comprehensive solution to our business problem.

2. Scope of Work

Scope of Work

The vendor is expected to deliver the following as part of their contractual obligations:

1. Specific Tasks and Deliverables:

The vendor shall supply 5052-H32 Aluminum Sheet 4x8 from Alro Steel (Buffalo, NY). The price range for the sheets should be within \$100 - \$150 per sheet. The vendor is responsible for the delivery of the sheets to Buffalo, New York. The vendor must ensure a consistent supply of the 5052-H32 Aluminum Sheet 4x8.

2. Technical Specifications or Required Standards:

The supplied product must meet the following standards: Industry-standard specifications and quality requirements. The vendor must adhere to these standards and ensure the quality of the product is maintained at all times.

3. Quantifiable Performance Metrics:

The vendor's performance will be measured using the following key performance indicators:

- On-time delivery to Buffalo, New York

- Quality compliance rate >98%
- Competitive pricing within \$10 - \$450
- Responsive customer service

The vendor is expected to meet these performance metrics consistently. Any deviations from these metrics will be considered a breach of contract.

4. Additional Services:

Beyond the delivery of the product, the vendor is also expected to provide regular quality reports. These reports should detail the quality checks performed, the results of these checks, and any actions taken to rectify quality issues.

The vendor must also maintain a responsive customer service line. The contact for this service is buffalo@alro.com. The vendor is expected to respond to any queries or issues in a timely and professional manner.

In summary, the vendor is expected to supply the specified product, meet the required standards and performance metrics, and provide additional services as detailed above. The vendor's adherence to these requirements will be key in determining the success of this contract.

3. Vendor Qualifications

Qualifications

The vendor must meet the following minimum qualifications:

Required Experience: The vendor must demonstrate a proven track record in supplying 5052-H32 Aluminum Sheet 4x8 or similar products. A case in point is Alro

Steel, which claims expertise in aluminum sheets. We expect vendors to provide evidence of their experience in the form of relevant past projects or case studies.

Certifications: The vendor must hold ISO 9001 or an equivalent quality management certification. Additionally, any industry-specific certifications that are applicable should be held by the vendor. These certifications should be current and valid at the time of proposal submission.

Team Skills and Domain Expertise: The vendor's team should possess expertise in manufacturing or distributing 5052-H32 Aluminum Sheet 4x8. They should also have robust quality control and assurance processes in place. Proficiency in logistics and supply chain management is required, along with the ability to deliver to Buffalo, New York. Furthermore, the vendor should offer technical support and customer service to ensure smooth operations post-delivery.

Compliance and Regulatory Requirements: The vendor must comply with all relevant local, state, and federal regulations pertaining to the manufacturing and distribution of 5052-H32 Aluminum Sheet 4x8. Evidence of compliance with these regulations should be provided.

Vendors who do not meet these minimum qualifications may be deemed ineligible for consideration. We encourage all potential vendors to carefully review these qualifications before submitting their proposal.

4. Project Timeline

SECTION IV: PROJECT TIMELINE

The following timeline provides a high-level overview of the anticipated project schedule. Please note that this timeline is subject to change based on the vendor's proposal and

subsequent negotiations.

Project Kickoff: The project is scheduled to commence on November 02, 2025. This will involve an initial meeting to discuss project requirements, expectations, and deliverables in detail.

Initial Delivery (MVP): The vendor is expected to deliver a Minimum Viable Product (MVP) within 60 days from the project kickoff. This initial delivery will serve as a key milestone in the project timeline and will be subject to review and approval by our team.

Quality Inspection and Acceptance Testing: Upon delivery of the MVP, a rigorous quality inspection and acceptance testing phase will commence. This phase should be completed within 5 business days of delivery. The vendor will be required to rectify any identified issues or defects promptly to ensure the project remains on schedule.

Project Completion: The final completion and delivery of the project are scheduled for January 24, 2026. This will include the delivery of all project deliverables, final testing, and sign-off.

Flexibility and Constraints:

While we understand that project timelines may need to be adjusted due to unforeseen circumstances, we expect the vendor to adhere as closely as possible to the proposed timeline. Any significant deviations from the timeline will need to be communicated and justified in advance.

Please note that the timeline has been structured to ensure that key milestones and review points are met. These are critical to the project's success and must be adhered to.

In conclusion, this timeline provides a structured and clear roadmap for the project's execution. We look forward to receiving your proposals and working collaboratively to achieve the project's objectives within the stipulated timeline.

Milestone	Description	Target Date
Project Kickoff	Initial alignment	November 02, 2025
MVP Delivery	First prototype	Initial delivery: Within 60 days
Testing Phase	QA and user testing	Quality inspection and acceptance within 5 business days of delivery
Final Deployment	Production release	January 24, 2026

5. Evaluation Criteria

Section IV: Evaluation Criteria

The purpose of this section is to outline the evaluation criteria that will be used to assess and score the proposals submitted in response to this Request for Proposals (RFP). The evaluation process will be rigorous and will consider a range of factors, including but not limited to technical capability, pricing competitiveness, delivery reliability, quality assurance, and customer service.

A. Weighted Evaluation Criteria

The evaluation of proposals will be based on a weighted scoring system. The weights assigned to each criterion reflect its relative importance in the overall evaluation process. The weights are as follows:

Technical Capability (30%): This criterion assesses the proposer's ability to meet the technical requirements outlined in the RFP. Proposers should demonstrate their understanding of the project's technical needs and their ability to deliver the required services or products.

Pricing Competitiveness (30%): This criterion evaluates the competitiveness of the proposer's pricing structure. Proposers should provide a detailed and transparent pricing proposal that demonstrates value for money.

Delivery Reliability (20%): This criterion considers the proposer's track record in delivering services or products on time and within budget. Proposers should provide evidence of their reliability in previous similar projects.

Quality Assurance (15%): This criterion assesses the proposer's quality assurance processes and their commitment to delivering high-quality products or services. Proposers should provide information about their quality assurance policies and procedures.

Customer Service (5%): This criterion evaluates the proposer's approach to customer service, including their responsiveness and their ability to effectively manage customer relationships.

B. Required vs. Optional Capabilities

Proposers should clearly distinguish between required and optional capabilities in their proposals. Required capabilities are those that are essential for the successful delivery of the project, while optional capabilities are those that could enhance the project but are not essential. Proposals that do not meet all required capabilities will not be considered.

C. Qualitative Factors

In addition to the weighted evaluation criteria, the evaluation process will also consider qualitative factors. These may include the proposer's understanding of the project, their proposed approach, their team's qualifications and experience, and their capacity to deliver the project.

D. Additional Notes

At this time, there are no additional notes to consider in the evaluation process.

Please note that all proposals must meet the non-negotiable requirements outlined in the RFP. Proposals that do not meet these requirements will not be considered. The non-negotiable requirements are not included in this section as they will be added separately in the template.

Criteria	Weight (%)
Technical Capability	30%
Pricing Competitiveness	30%
Delivery Reliability	20%
Quality Assurance	15%
Customer Service	3%

Non-negotiables:

Must be able to deliver to Buffalo, New York

Product must meet specification: 5052-H32 Aluminum Sheet 4x8

Pricing must be competitive and within budget: \$10 - \$450

6. Pricing Details

Section IV: Pricing Details

The purpose of this section is to provide vendors with specific instructions on how to structure their pricing proposals. The pricing proposal should be comprehensive, clear, and transparent to allow for a fair and accurate comparison of all bids.

A. Pricing Format and Currency

All prices must be quoted in United States Dollars (USD). The pricing format should be a detailed line-item breakdown with unit costs and quantities. This format should clearly identify the cost of each item or service being provided, the quantity of each item or service, and the total cost for each line item.

B. Contract Length

The contract length for this project is expected to be one year. Please ensure that your pricing proposal reflects this duration and that all costs associated with the full contract term are included.

C. Cost Categories

The pricing proposal should include, but not be limited to, the following cost categories:

1. Unit price for 5052-H32 Aluminum Sheet 4x8
2. Shipping and logistics to Buffalo, New York
3. Taxes and duties
4. Quality inspection fees (if applicable)
5. Rush delivery fees (if applicable)

D. Volume Discounts and Performance-Based Pricing

If applicable, vendors should include information about volume discounts. If the volume of purchases increases, we expect to see a corresponding decrease in unit prices.

Additionally, vendors are encouraged to propose performance-based pricing models. These models should clearly outline any performance metrics that will be used to adjust pricing, and how these adjustments will be calculated.

E. Budget Range and Payment Terms

The budget range for this project is between \$10 and \$450. Vendors are requested to provide their best and final offer within this range.

The payment terms for this project are Net 30 days from delivery and acceptance. This means that payment will be made within 30 days of the delivery and acceptance of the goods or services.

Please ensure that your pricing proposal is clear, detailed, and adheres to the guidelines provided in this section. Proposals that do not meet these requirements may not be considered.

7. Submission Instructions

A proposal must include the following in their response:

1. A brief history of the proposing entity, including general background and past deals.
2. A statement substantiating the resources of the proposing entity and the ability to carry out the scope of work requested within the proposed timeline.
3. Proposed fee structure, including billing rates, reimbursable expenses, etc.
4. At least one (1) example of work.
5. A statement of conflicts (if any) the proposing entity or key employees may have regarding these services. If no potential conflicts of interests are identified, please state so.
6. Preferred: References including contact information.
